Description

Darren reports that Image Tool can not read live images from either of the ASTA front ends.

History

#1 - 09/11/2014 11:37 AM - John Diamond

Java DMQ is returning a TimedBinary where we were expecting a TimedIntegerArray. This is a new type and seems to have been introduced without making me aware...

#2 - 09/11/2014 12:02 PM - John Diamond

Moved to accepting TimedBinary. Fixed released in version PR-62020.

#3 - 09/11/2014 12:06 PM - John Diamond

Desktop test successful in reading live images from camera 121280. Waiting on confirmation from Darren.

#4 - 05/15/2015 01:17 PM - John Diamond
